# Nothing left to do but simply relax

## Touch Screen Thermostat

Every Hotwire Heating System comes with a fully programmable touch screen thermostat. Simply program it around your lifestyle for luxurious heating whenever you require it.

**Fully programmable**  
Floor or air sensing

**Multiple daily functions**  
Touch Screen

# So easy to set

## Control your settings with the convenience of the Hotwire mobile app

We also offer a WiFi thermostat. You can control all the settings on your Hotwire system with the convenience of a mobile app.

## Programmable Timer for Heated Towel Rails

The Hotwire Programmable Timer allows you to turn your towel rail On and Off and also select 2 or 4 hours of operation. Simply turn it on when you get up in the morning and your towel will be lovely and warm when you need it. Return your towel to the rail and it will be dry before you know it.

**Built-In to towel rail**  
**Co-ordinating colours**

# Affordable luxurious warmth for your loved ones

Hotwire Floor Heating may well be the very ultimate in home heating.

Floor heating radiates warmth from the ground up, heating not just your feet but your entire home. Hotwire is luxury you can afford. An average bathroom system is yours for approximately \$800 RRP and a living room for only \$2500 RRP\*. As the heat is evenly spread throughout every room, it's just like standing outside in the first few days of Spring; beautifully warm and thoroughly luxurious.

\*Based on a 4m<sup>2</sup> bathroom and 40m<sup>2</sup> living room. (Excluding installation)

# Heating for a room, an open living space, or an entire house

## Under Tile Heating

Under Tile Heating is perfect for the Australian climate. The 4mm thick element is placed directly on top of the sub floor and the flooring simply laid over the top. As the element is so close to the floor surface your home will be warm in 30-60 minutes.\* The fully programmable touch screen thermostat can program your floor heating to switch on when you require it, so when you arrive home or get up in the morning your home is luxuriously warm and waiting for you.

Under Tile Heating is ideal if you are renovating as only the floor surface needs to be replaced to facilitate installation. You can cover an area as small as 1m<sup>2</sup> through to the biggest living areas. With running costs as low as 2c per m<sup>2</sup> per hour it sells itself.

Hotwire is perfect for a bathroom as the heating will not only heat the floor but also dry the floor meaning less mould and therefore less cleaning.

\*Home insulation and some environmental factors can affect the heat up time of floor heating systems.

## Temperature Profiles for Various Methods of Heating

## Other styles of Floor Heating from Hotwire

### In Screed Heating

In Screed Heating is ideal if you are installing a sand and cement screed over a floor surface or planning a polished concrete floor. Whether you are building a new bathroom or an extended living area In Screed Heating is a perfect solution.

The element sits approximately 30mm deep in the screed and spreads an even warmth throughout the entire room. It does take a little longer to heat than Under Tile Heating (up to 2 hours) but may be the ideal solution for your project.

### Heating Mat

Heating Mats are available in Under Tile Heating and In Screed Heating.

Hotwire Heating mats have the added bonus of the heating element being already fixed to a self adhesive fibreglass mesh. This makes installation a breeze as you simply roll out the system across your floor.

As with all Hotwire products the fully programmable thermostat is standard. You just need to choose which colour you want!

### Forced Air Heating vs Radiant Floor Heating

**10**  
YEAR WARRANTY  
HEATING ELEMENT

**2**  
YEAR WARRANTY  
THERMOSTAT

# More efficient heating for your home

## Running costs of Hotwire vs Heat Lamp

\*The comparisons are based on a 4 bulb Heat Lamp unit at 375 watts per bulb. Hotwire costs based on a 600 watt element heating at full capacity for 1 hour and then cycling at 50% capacity for the next 2 hours. Running cost of \$0.26 per/unit is an estimate only and will vary due to site conditions.

Get the clean, hygienic flooring you've always wanted without sacrificing warmth

Australia's favourite renovators  
**The Block's Kyal and Kara,**  
 love their Hotwire

"We used Hotwire in our first season on The Block and in various projects since. Hotwire is a great product, easy to install and excellent value for money. Hotwire offers brilliant backup and support and we are very happy to recommend them."

-Kyal and Kara

## Programmable Timer

The Hotwire 24 hour timer is a great optional addition to your Low Voltage Rails. It saves energy and cuts down on your power bill, as the rail only heats up when you need it. This also means your towels are warm right when you want them, adding a touch of comfort to your daily routine.

# Slimline elegance Low-voltage efficiency

Discover the perfect blend of sleek design and energy efficiency with our Slimline Vertical Rails. Engineered for low voltage use, it offers an eco-friendly, cost-effective solution to warm your towels. Its slender profile not only saves space but also adds a touch of modern sophistication to your bathroom.

A choice of colour and finish for any bathroom

“Using Hotwire Floor Heating for the first time is like flying first class or business class for the first time. It’s not a dire necessity, but damn does it feel good. Trust me, no matter where you live in Australia, you’ll never go back. And the best thing? Hotwire is WAY cheaper than you think.”
